

The timber renaissance: multi-storey, children and animals

A half-day breakfast seminar, international and award winner speakers, for design, development and construction professionals.

Headed by Prof Alex de Rijke, director of UK firm dRMM, your panel of speakers will highlight the renaissance of wood and wood products as a building material.

From a global overview of the trend, and its environmental gains, to discussions of real world projects, education and zoos – children and animals.

When: Monday, 9 November
7.30am Registration & breakfast
buffet for 8.15am start

Where: Linton and Kay Gallery,
Old Perth Technical School, Level 1,
137 St Georges Terrace, Perth

Cost: \$65 (Free for faculty staff,
architecture, building design and
engineering students with student ID,
to a maximum of 20 staff and
students per seminar)

→ Register Now

**'Experiments in
Engineered Timber'
Prof Alex de Rijke - dRMM Architects**

Responsible for the often-quoted statement, "If the 19th century was the century of steel and the 20th century the century of concrete, then the 21st century is about engineered timber." Alex's presentation follows his practice's fascinating journey through a decade of working on high-profile engineered timber projects.

**"De-Puzzling the
JSRACS Kindergarten"
Tom Brooking - Brooking Design**

This highly acclaimed space is much more than a "pretty puzzle picture", Tom's presentation will showcase the critical thinking behind the development of the seamless timber design solutions crafted for the kindergarten.

**'Orang-Utan Colony -
Rejuvenation at the Perth Zoo'
Finn Pedersen -
Iredale Pedersen Hook**

A vital link in the world's captive breeding chain, the Perth Zoo's rejuvenated Orang-utan enclosure is designed to maximise the experiences of its residents and visitors alike.
